Subject: Farm Plan

Hi John,

This is a single data point that may not be worth much, but I figured I would pass it on - the county recently informed us it has no record of a "[farm plan](#)" for the Gunshy Manor property. I don't believe it's a requirement but it allows additional flexibility for agricultural operations, particularly those near critical areas. If anything, it provides some minor support to the fact that they're not too serious about the agricultural operations there - especially as those operations interact with critical areas.

Thanks.
